# Conference on International Green Building

USEPA Offices, Metcalfe Federal Building

Third Floor Conference Center, 77 W. Jackson Blvd., Chicago, IL 60604

**July 16**

This conference will be one full day in length, beginning with **speakers** in the morning and ending with **panel discussions** at the conclusion of the day.

Discussions will center around green building and “cross-pollination” of technologies, strategies, and the philosophies of building green from around the world. The event will serve as an excellent opportunity for networking, and will further efforts toward greening existing construction paradigms.

The Conference on International Green Building will be of great value to architects, engineers, developers, building owners and operators, government officials and other members of the building industry who are interested in increasing their knowledge of green building practices and rewards.

## List of Invitees: Conference on International Green Building

USEPA Offices, Metcalfe Federal Building

Third Floor Conference Center, 77 W. Jackson Blvd., Chicago, IL 60604

**July 16**

### **Guy Battle**

Mechanical engineer

*Battle McCarthy Engineers,  
London, UK*

Battle McCarthy is one of the most innovative of the European **systems engineering** firms. Its practice is focused on daylit, naturally ventilated green buildings, and ecological restoration of sites. The firm's diverse project list includes the Shell Centre in London, restoration of the Thames embankment and Millennium Dome site in Greenwich, and a new office complex in Singapore.

### **Wulf Daseking**

Director of Planning

*Freiburg, Germany*

Daseking is a leader in **solar residential design** in Germany. Wulf is currently the Director of City Planning Construction in Freiburg, Germany and is involved in numerous urban design issues. He has also been a lecturer at the Freiburg University School of Business.

### **Huston Eubank**

Senior Research Associate  
and Consultant

*Rocky Mountain Institute*

Eubank is a registered architect with 30 years' diverse experience inside and outside the profession. His expertise and interest covers integrated design, whole-systems thinking, and energy-efficiency on numerous large commercial and industrial projects. At RMI he has worked on numerous projects including Lucasfilm's Letterman Digital Center, Energy Efficient Internet Data Centers, Greening the California State Capitol, and environmental design for schools in Brazil.

### **Alan Short**

Architect

*Short Architecture, London and  
Leicester, UK, and Head of the  
Martin Centre of Graduate  
Architectural Research at  
Cambridge University*

Short designed some of the most dramatic entirely **passively ventilated** structures in the world, including the Queens Building at DeMonfort University, the Contact Theatre complex in Manchester, and Farson's Brewery in Malta.
